Call for paper for Special Issue

National Innovation Systems in East Asia and ASEAN Countries

Guest Editor Professor Ki-Seok Kwon, Hanbat National University, South Korea

East Asian and ASEAN nations have had exceptional economic growth during the past 50 years. In contrast to the other regions, these areas do not have as many extensive scientometric studies. Scientometric studies would help to enrich the structure and dynamics of research and innovation ecosystem in these countries and give a holistic view of the research-innovation ecosystem in this region. It would help in understanding the parallels and variations in the innovation systems of these locations, and furthermore. Additionally, recent methodological developments are noteworthy as a result of the use of ICT in Bigdata analysis on social phenomena and policy studies. Particularly, in the field of science policy and innovation studies, bibliometric analysis and newer methods like machine learning are frequently utilized in scientometric research. Evidence-based policy suggestions, which are based on these assessments, can increase the acceptability of the policy's objectives among a larger range of people.

The Special Issue intends to publish your unique scientometric papers on these themes. In light of this, we invite you to submit papers on the following subjects related to East Asia and ASEAN nations.

- New scientometric indicators measuring national innovation system
- Measuring university-industry collaborations in a country
- National, regional, and organizational characteristics based on technometrics and bibliometrics
- Science-technology linkages in a specific technology area
- Measuring university-industry collaboration
- Bibliometric analysis on innovation studies in those countries
- Inter-region collaboration in a specific industry
- Influencing factors on scientific productivity
- Traditional econometric approaches on technological innovation

The Special Issue was conceptualized during the Asian Society of Innovation and Policy (ASIP) 2023 conference in Kuala Lumpur Malaysia. ASIP will be actively involved in the development of the Special Issue.

Deadlines

- *Abstract to be submitted by 30th November, 2023*

Abstract to be sent to Guest Editor Prof Ki-Seok Kwon in the following email kwon5861@gmail.com

- *Authors of selected abstract will be invited to send full papers.*

The full papers have to be submitted through the journal editorial system

Full paper to be submitted by 31st January, 2024.

- Expected Publication date of the Special Issue

15th March 2024

Key Aspects to be kept in Consideration while developing Abstracts/Papers

Authors need to consult the journal <https://jscires.org/>

The journal scope, aim, guide to authors and papers published in the journal to get an informed idea of papers that the journal publishes.

The authors need to strictly follow the Instructions to authors <https://jscires.org/instructions-to-authors/>
